modern vinyl floors

barlinek.com

real wood look

Our modern vinyl floors are **inspired by nature**. It is nature and the world around us that dictate the character of this collection, because as wood specialists, we know that only true things are always fashionable and stylish.

Different parts of the world, different species of trees, different latitudes, but still the same desire - to have **a modern** and **extremely durable** floor.

Only these patterns, beautiful and timeless, perfectly blended with the power of wood and stone, make it possible to enjoy **a modern vinyl floor for many years**.

♀Barlinek

E

rigid and extremely durable

Next Step[™] vinyl floors are characterised by exceptional durability - guaranteed by the **DENSCORE[™] core**, which is **made from 100% eco friendly components**. A floor made this way is extremely stable and does not deform when exposed to high temperatures.

The advantage of our modern vinyl floors is their aboveaverage resistance to intensive use, thanks to which these floors are considered to be **the most durable on the market!**

An additional advantage is that the flooring is protected with polyurethane-mineral **Diamond Shield coating which provides excellent durability.**

Importantly, when installed in accordance with the instructions and recommendations of Barlinek, the floors do not require threshold expansion joints and the maximum area on which they can be installed is as large as **225 m²!**

for underfloor heating

Our floors are perfect for underfloor heating. The **DENSCORE™** mineral core has excellent **heat conduction** parameters - the floors heat up quickly and cool down slowly, thus increasing the energy efficiency of the heating system.

At the same time, the highest parameters prevent the Next Step[™] floors from deforming and changing dimensions, thus making this flooring **remarkably stable**.

It is therefore the best solution for use in rooms where the installation of **underfloor heating** is planned.

100% waterproof

The Next Step[™] vinyl floors are **fully waterproof**.

Manufactured from 100% waterproof materials that are not susceptible to moisture. Even the lock connecting the individual panels is fully watertight.*

This makes the Next Step[™] floors ideal for rooms such as kitchens, bathrooms, and hallways. You can install these modern vinyl floors without any limitations and **in all interior rooms in your house**, according to your preferences.

*Further information can be found in the fitting instruction and guarantee card.

advantages of the floor

REAL WOOD LOOK

It is nature and the world around us that dictate the character of this collection, because as wood specialists, we know that only true things are always fashionable and stylish. Natural wooden patterns, created by nature, can be found in these floors.

A STABLE STRUCTURE

The Next Step[™] vinyl floors are characterised by exceptional rigidity - guaranteed by **the DENSCORE[™]** mineral core, which is made from 100% eco friendly components. A floor designed this way achieves outstanding stability and does not deform when exposed to high temperatures. The maximum area on which the floors can be installed is as large as 225 m²!

RESISTANT TO INTENSIVE USE

Above-standard resistance to micro-scratches caused by dust, moving furniture or chairs with castors. The flooring can also be installed in interior rooms such as hallways, corridors, and patio exits. It is extremely durable thanks to **the Diamond Shield** coating.

FOR UNDERFLOOR HEATING

The DENSCORE[™] mineral core has excellent thermal conductivity parameters - the floor heats up quickly and cools down slowly. It is therefore the best solution for use in rooms where the installation of underfloor heating is planned.

100% WATERPROOF

Modern vinyl floors are a perfect solution for rooms where contact with water is most frequent. With the Next Step[™] flooring, you can choose from a wide range of colours and be assured that splashes and spills are not a problem. An elegant bathroom or kitchen complemented by our floors will stay beautiful and stylish for years to come.

ENVIRONMENTALLY FRIENDLY

Why is that so? Because it is a zero-emission product. What does it mean? It means that all components used in the production of the floors are subjected to rigorous testing procedures for both phthalate and heavy metal emissions. Production of modern vinyl flooring uses a highly advanced technology that meets the most stringent regulations for manufacturing. How do you benefit from this? The product is completely safe and friendly for you and all household members.

WARM TO TOUCH

The transparent outer vinyl layer is warm and pleasant to the touch. Installation of these floors increases the comfort of the surroundings and adds charm to the interiors. Modern vinyl floors with a perfect reproduction of the wood grain can from now on provide a feeling of cosiness. The Next Step[™] flooring is the perfect combination of nature and safe use for many years to come. With it, your interiors will become even more beautiful.

LOW-NOISE

We know how to ensure comfort and that is why we have made sure that our floors are exceptionally quiet. The Next Step™ modern vinyl flooring does not make knocking sounds or transmit sound - no need to tiptoe around while your kids are asleep. This is guaranteed by the flexible structure of the top vinyl layer which maintains the highest parameters of durability and by the specially selected Next Step™ Extreme sound-absorbing underlay. You can walk as much as you want, but your steps will be silent and will not disturb anyone.

SAFE FOR CHILDREN

We all dream of creating a home that is safe for us and our children. At the same time, we want it to be a place that unleashes creativity and provides unhindered development. That is why vinyl flooring offers reassurance and peace of mind, as well as a softness and a welcoming temperature for those who spend a lot of time on the floor. And, as hygiene is an essential element when it comes to children's surroundings, we have also ensured that the Next Step[™] flooring is guaranteed to be easy to clean.

PET SAFE

We know that the love for pets is boundless and they are members of our families. Therefore, by choosing modern vinyl flooring, you can be sure that we have taken care of this matter for you: the flooring is scratchresistant and has a high chemical resistance index. All this makes our vinyl flooring ideal for rooms where pets are welcome. You do not have to worry about long hours of cleaning either - the Next Step[™] flooring can be washed easily and frequently!

QUICK RENOVATION

Unlike any other types of flooring, modern vinyl flooring is suitable for quick renovations and, most importantly, can be installed on almost any surface! This is made possible by the rigid core and the super strong lock connecting the flooring. Vinyl floors with the **DENSCORE™** core have no telegraphing effect: it does not reflect unevenness of the floor. Combined with the specially selected EXTREME 1.5 sound-absorbing underlay, it levels most irregularities and imperfections of the subfloor. If you want to install new flooring on top of ceramic tiles, a wooden floor, a cement or anhydrite floor, or on top of an existing non cushioned resilient flooring - it is now possible, without having to remove the subfloor.

exceptional durability of the **DENSCORE**TM core

Thanks to the hard-elastic mineral DENSCORE[™] core, the Next Step[™] flooring is highly resistant and improves the energy efficiency of the underfloor heating system.

the world at your fetter

You have everything you need: nature and modernity. Take advantage of it and enjoy every moment.

SANTORINI SUN

1V2000001

Santorini is considered to be one of the most beautiful places on Earth. Its white buildings glistening in the sunlight are a must-see for couples in love and newlyweds, as they are supposed to ensure a beautiful and prosperous life. The light-coloured floor will take your memories back to this magical island.

a house ful of guests

A great place for fun and family meetings. So, see you at our place?

PBarlinek

44

1V2000003

Carrara is bordered on one side by the snow-white Alps and on the other by the turquoise water of the Ligurian Sea. Since the time of the Roman Empire, it has been the source of marble of unique beauty. Michelangelo himself visited the quarries to choose materials for his sculptures. This beautiful and durable floor will allow you to enjoy it carefree for years.

perfect silence

Quiet and blissful such are the mornings you love. Dawn passes slowly and you have a moment for yourself.

PBarlinek

CHANEL THE FASHION BOOK

1V2000005

The Pacific Ocean is home to more than 25,000 islands, often virgin, unexplored, or forgotten. It was Magellan who called these waters the "mar pacifico" or sea of peace. This ultra-quiet floor will soothe your nerves daily when you just want to rest and relax.

RICH LINE 31

run home

There's no place like home. Feel the warmth of the household hearth.

CORAL BAY

1V2000002

The most popular resort in Cyprus with a picturesque bay encourages visitors to dive while the vast beach and the clear, blue sea invites to sunbathe or take long walks on the hot sand. Rekindle those memories with a floor that is perfect for underfloor heating.

catch you breath

This is where you rest and recharge your batteries, which is why all the equipment and furniture must be environmentally friendly.

RIVIERA MAYA

1V2000004

The Caribbean is about crystal clear waters washing over white sand on wide beaches. The coral reefs stretching along the shores of the Yucatan Peninsula are classified as the second longest in the world. Enjoy your floor, confident that it was made with respect for nature and the beauty it has to offer.

home sweet ho

Floors created also with children in mind. You can carelessly and safely explore the world.

MYSTIC ELBA

1V2000006

The island, considered to be one of the most beautiful parts of Tuscany, lies very close to the mainland of Italy. It is a peaceful oasis, away from the hustle and bustle, and crowds of tourists. Older people will be delighted by Tuscan buildings along picturesque streets and younger ones will enjoy the safe and active recreation on more than 150 beaches. The light-coloured, charming flooring is also an extremely safe product for a home with children.

a chance to unwind

This is your home spa, a place of delightful relaxation. Warmth, aromatic scents and a chance to unwind.

NEVADA HEAT

1V200008

The sun-scorched rocks and sands of the Mojave Desert only get a reprieve from the heat of the day before it gets dark. Nevada is the second largest gold producer in the world. Will you set out to find your treasure among the fabulous lights of Las Vegas or do you need to relax? This beautiful, golden floor will work great with underfloor heating.

ready for change

It is so easy. A quick reno changing the thor, whenever you want.

CAIRO DUSK

1V2000007

During its thousand-year history, it has been the capital of the great medieval Egyptian dynasties, a British colonial enclave, and a modern industrialised city. While adapting to change, it has never lost its spirit and history. This dark flooring is also ready for a quick renovation and transforming your home.

a foundatio of life

The basis of any interior. A beautiful and durable floor.

PORT ROTTERDAM

1V2000010

The Port of Rotterdam is Europe's largest port and for a long time was also the world's largest port. It is a strong foundation for the world economy, and at the same time a colourful home to over 160 nationalities and many cultures. The dark floor, supported on a sturdy structure, will serve as a strong base for your interior.

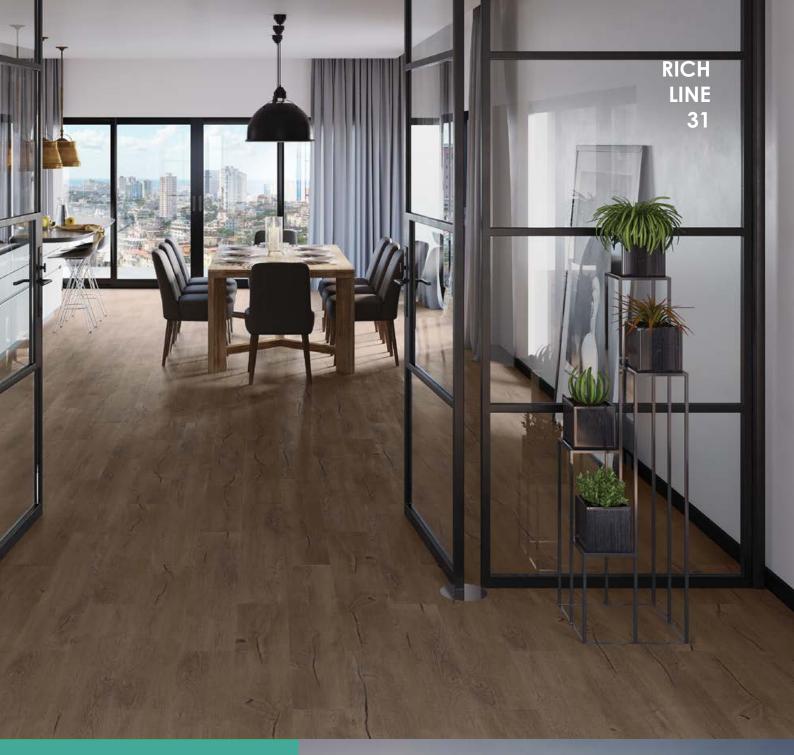

following nature

Keeping close to nature, following in its footsteps towards the best modern floors.

 $igodoldsymbol{arphi}$ Barlinek

1V2000009

Havana is Cuba's largest city by area and the third largest metropolis in the Caribbean. Also, about 7,000 different plant species grow in Cuba, half of which are found only on this island. The grain of the floor, as dark as Cuban tobacco, perfectly reproduces the nature and real wood.

underlay

EXTREME 1.5

To fully enjoy your new floor, install it with the **EXTREME 1.5** underlay which guarantees the best performance.

- protects the board joints
- absorbs noise
- perfect for underfloor heating systems
- environmentally friendly

The Provinsion Engine

Your bathroom, your floor

LVT panels provide a higher **thermal comfort** than ceramic tiles. They are always warm and nice to the touch.

They work well with underfloor heating systems, warming up instantly and transferring pleasant warmth underfoot.

Our vinyl flooring products provide very good anti-slip properties and are completely antistatic - they do not attract or accumulate dust.

Thanks to the **Diamond Shield** coating, you can easily remove all dirt and splash marks.

ecology in action

Since the beginning of its operations, Barlinek has been involved in many pro-environmental activities, including a tree planting programme. As a leader in the production of wooden flooring solutions, Barlinek understands that production optimisation and the use of raw materials in manufacturing have an invaluable influence on the conservation of renewable forest resources.

For each pack of Barlinek floorboards we plant one tree

We save the Peregrine Falcon

"Bartek" oak tree in our care
